TESTING PERIOD	<input type="text" value="30 days"/>
ONGOING TESTING?	<input type="text" value="Yes"/>
TESTING RESULTS (POSITIVE)	
<p>Very high quality collars both in leather and nylon. Snaps and base are high quality and tight. Very good consistency. Had no problems with the collars at all.</p> <p>Testers ended up swapping snaps when they met which was quite a bit of fun.</p>	
TESTING RESULTS (NEGATIVE)	
<p>Largest collar was not large enough for some larger dogs. Snaps did come off occasionally with medium and large dogs that scratched. Rarely other dogs would lose a snap.</p> <p>Loose snaps could be a choking hazard for very small pets and children, but there is a clear warning on the packaging.</p>	
PLAIN ENGLISH SUMMARY	
<p>A fun product with an unexpected twist that testers started swapping snaps when they met. It became a fun hobby for some. Being able to update your pet’s collar is just a great idea and eliminates the waste of throwing away a perfectly good collar because it gets boring.</p> <p>Expect that you could lose a snap occasionally, mainly on larger dogs that scratch. Collars held up very well.</p> <p>A great gift idea because it is so seasonal and unique.</p> <p>Heed choking hazard warning.</p>

---	--

- USE refers to intended use as advertised.
  - PROS refers to initial, expected or intended benefits of the product.
  - CONS refers to initial, expected or intended disadvantages of the product.
  - TESTERS This is the environment the product was tested. Products are tested in their actual intended environment however it is sometimes deemed useful to test in other environments especially when these are considered harsh.
  - TESTING RESULTS Based on approval reports received from our testers these are the average of those scores on a 1 (unacceptable) to 100 (outstanding) basis.
  - ONGOING TESTING Some products require ongoing testing and the approval outcome can change based on the results from this ongoing testing. No product will receive an “approved” status if it is not expected to pass ongoing testing.
  - TESTING RESULTS (POSITIVE) These are the positive results based on our testing.
  - TESTING RESULTS (NEGATIVE) These are the negative results based on our testing.
  - Testing is conducted on a limited basis and although results are expected to be similar for most consumers, all consumers must take appropriate precautions when using any product, not only for their pet but for humans as well.
  - The APA Approval does not include any chemical makeup of a product. No testing of chemical components of any product are made.
  - Updates to the Approval will be made online at [www.apaproved.com](http://www.apaproved.com). Consumers should always check the status of an approval before purchasing or using a product.
  - The American Pet Association/American Companion Animal Association does not accept any liability for any loss, cost, expense, liability or damage of any nature suffered by the manufacturers, distributors, clients or any third party as a result of a reliance on this approval.
  - Consumer feedback is a very important part of the ongoing Approval Process. Please leave your feedback at [www.apaproved.com](http://www.apaproved.com)
- 
- All uses of the APA Approved logo must receive approval before use/publication.
  - Use of APA Logo must be reported to [msapp@apapets.org](mailto:msapp@apapets.org) with a link to its use, photo of its use, or a copy of its use mailed to the APA (upon request)
